

Midland Texas  
August 5, 1928

Hon. J. T. Robison,  
Commsr Gen Land Office  
Austin, Texas.

Dear Sir:-

The following is a report of a survey showing the relative position on the ground of University Blocks 13 and 14, and the surrounding and adjacent Blocks of Public School Land, situated in Andrews County,

It appears that when Public School land Blocks A-41, A42, A43 and A44 was surveyed that the description of the corners along the South line of these Blocks show that the surveyor thought he was placing them in the North line of the University Blocks and with this belief he left the proper amount of space for University Blocks 13 and 14, placing them course and distance from the University Blocks on the South. That is he thought he was placing the S.E. cor of University Block 14, 8 Miles Northerly and 8 miles Westerly from the N.E. cor of University Block No.1.

Mr Twichell, a few months after these field notes were filed ran a line from the T.&P. reservation 31 miles Northerly to the N.W. cor of University Block 4, and placed a corner there, and from this run he laid in Block A-19, and connected ~~the~~ to Block A-44, A45, and A55. which showed that the Public school land Blocks were not placed against the University Blocks on the East.

So whatever they liked connecting up here is just how much out of place the ~~last~~ University Blocks 13 and 14, were left.

The sketch submitted herewith shows the relation of the lines of Blocks 13 and 14, with the surrounding school land, when placed according to course and distance from the University line as ran by Mr Twichell.

Evidently had Mr. Twichell pursued his work further he would have placed a survey or so along the West boundary of Block 14 University, using, as instructed, only course and distance for the location of the University Blocks.

So I accordingly offer the Sketch submitted herewith as a completion of the work started by Mr. Twichell.

Yours Very Truly
