 2810 m. uniform corner
 for the N.W. Cor. of Sur. 7: 342.
 194.

it is fully 2610 m.
 back for 1896. estimate

Call for 5100. m. long near corner

This line is established by J. P. Groves in 1883. to ascertain the distance
 between the Balcones and Amador Survey and to locate Sur. 7: 415. head. Co.
 all the corners of the Survey south, are on said line

The red corners show where the
 original lines are, and judging
 from the marks on the trees, the division
 they were run

Sketch showing the three leagues and
 the course of the Balcones very nearly as it
 is on the ground.

By C. A. Bompfel
