I, N. C. Breddlove, a private surveyor and 2nd County  
 Surveyor of Fisher County, Texas, hereby certify that the foregoing  
 Plat correctly represents the ground work of the Randolph, Wheeler, Dees,  
 and Richardson Surveys and their connections, that in surveying the same, I began at the  
 most Westerly S.W. corner of Sec. 6, Block E, Sally English Sur. both witnesses still there, the only marked  
 standing corner in that Block, except one at extreme West corner of Sec 7, to which I have been and tested the work  
 from it also; That corners marked in Red Ink are the errors made by Martin Duvall in establishing the lines  
 of the surveys mentioned in about the year 1844. That to place the N.E. corner of Sec 3, English Survey 128 vs  
 N70°E from Dry Lake as called for in its Field Notes make the North line of that Section excessive 44 1/2 vrs.  
 That all corners marked in green ink have been adjusted by me, and the green arrows lines run by me and  
 S.H. Lyons County Surveyor or Fisher County, Texas.

N. C. Breddlove

P. S. Lyons County Surveyor of Fisher County Texas, do hereby certify that I  
 have visited all of the work on the ground from the bearings as given in  
 the above Plat and I find the course and distance correct  
 Therefore I adopt and approve the Plat as True and correct  
 P. S. Lyons County Surveyor  
 of Fisher County Texas.
