J. T. Lofton Esq.

Dear Sir:-

The pile of stone with marks  $\bar{x}$  were put there for S. W. corner Jno. Walker Fractional L. & L. grant by our party. Also N. W. corner of same. The other corner Blk. 24 was put as you found and intended for corner as stated. The line of stone piles is<sup>s</sup> our work, put there 1877 or 78. The line north- for west line of Jno. Walker is a continuous line connecting N. & S. locations-oldest work in that section. The line is correct. The line was run twice without any alteration. The S- connection and beginning is the bottle corner, S. of creek in Llano Pasture. N. connection being corner on Spring Creek in HHH pasture, 3 or 4 miles N. of Sam Gholson's Homestead at spring in HHH ranch. My reply,

(signed) Jasper Hays.
