P. J. Le Hamm County Surveyor of Hall County hereby certifies that this sketch only and correctly represents the relevant portions of the surveys delineated therein. I determined the locations of these various surveys from the galvanic pipes, placed by Mr. Le Hamm in 1902 under order of Court and from the stone corners established by Jos. H. Parks in 1890 as district surveyor of Sandy Land District and from the various original stone corners of the townships surveys here shown, and that I identify almost all the marked corners of Le Hamm Co. Survey of 1890.
