

The figures inscribed in this sketch are correct according to the field notes of the respective surveys, but the boundary lines of the same are incorrectly drawn, as it seems, to suit the purpose.

The distance between the S. line of A. Estep's survey and the N. line of W. Fullerton's survey is according to the River surveys N. 30. W. 2381 vs.

while the figures in this sketch makes the same 2170 vs. only leaves a vacancy between J. A. Dickson & A. Skeen of 211 vs.

J. A. Dickson's survey does not close.

March 31/74

A. Estep  
Thiecapay

I hereby Certify that the above plots correctly represent the above surveys as made on the ground given under my hand at the town of Celebune Nov 6<sup>th</sup> 1873
