My dear Sir,

If you will remember
I was in your office in June, and asked
for your opinion as to the proper
location of Survey # 2. m. m. ^NHines. Cont. 745
your instructions, were to ignore all
rock mounds, as they could not be identified,
but to take course and distance from
Grierson Springs, allowing 1901 us. per
mile, so as to give University Lands
their full amount.

I will probably return to Reagon Co.
about the 26th to finish this work
and will you please advise me the

N.M.M.

82241

proper variation the university lands
should be run on.

about two years ago, before I left San
Angelo, the parties owning survey
2, M. M. Heiser and survey # 3, whatley
agreed that where I should locate
the line was to be final and went
into contract to that effect.

Thanking you in advance for this
information, I am yours truly
J. E. Beavers

D. S. will send you map of my
location when I have finished survey,
J. E. B.
