189.....

You have platted the 13th call correct 2327 2098
" " " " 14th " " " 2658 5040

The 13th call is 600 and not 60000 as shown
by your sketch

When you correct your sketch I trust you
will find that I am correct

The South line of Cassanova is not as long
as called for in original notes so you must be guided
by data such you as to other line

Referring to original corners of this side of river
that can now be identified are the upper corner of the
Ruiz and the lower corner of the Allen. The upper corner
of the Thomas was standing several years ago but would
have before I ever got a connection to it. I further
could only show me with in a few feet of when it stood

After correcting if every thing is not plain
I will send you in sketch on a large scale

Yours truly
Geo Myers

P.S. The west line of the Oscar Whiggin calls for 2199
Your plat shows abt 2500 or
