San Antonio Aug 30. 1857

S. Crosby Esq. Comm^r G. S. Office

Dear Sir

The accompanying tracing paper sketch of Lagunillas Creek, taken from the map of Atascosa Co in this office, gives in my opinion, a correct idea of the conflict between the old work done by Hays in 1838 and the late work returned by C. de Montel in 1853.

I have arrived at that conclusion, by taking a plat of Hays' work, on tracing paper, and applying the forks of the creek in No 166 or 266. of Hays' work, to the forks represented in Montel's maps; South of his Survey No 81, and East of his No 83, when the coincidence between the creeks represented on the 2 maps became almost perfect, as may be seen on the accompanying sketch. When Hays' work is represented in Red and Montel's in Black Ink.

J. Giraud
