

The above sketch shows the respective surveys according to the original fieldnotes, as surveyed by Sims & Shackelford in March 1835.

Chas. S. Smith titled, Jacob Walters and Sam'l. Wolfenbarger, both parties, agree with said original fieldnotes, but L. Leverence, surveyed by Sam'l. H. Reid in 1848, differs in length of lines and bearings as indicated above in red ink, and seems to conflict with Jacob Walters survey.

September 17/73.
