

OFFICE OF

DISTRICT AND COUNTY CLERK,
BAYLOR COUNTY.

JOHN T. RANSON, - - Clerk,
NAT G. MITCHELL, Deputy.

590

Received July 6/99

Seymour, Texas, July 3rd 1899

How Geo. W. Finger
Land Owner.

Filed &
O.K.

Inclosed find certificate
of corrections made in field notes of E + W halves
of Survey No 2 Cont No 33 S.K. Barrack
and of corrected field notes of Sur No
2 The State of Texas, by virtue of same
act.

It I should like to know if present
Commissioner is satisfied with all
my connections in BLK A. for B B
B + C R R Co and also the connection
between BLK "A" and BLKS 1 + 2
H. + J C R R Co. My connections
agree, ^{practically} with Mr Kenney, State Sur,
and Ex. Co. Sur. of Wilbarger Co.
I Your predecessor asked me to give ^{complete}
sketch showing relative position of
all identified corners in BLK A.
and the distance between + to all
branches etc in said BLK in that
part of BLK A. from 10th to 15th corner

DISTRICT AND COUNTY CLERK,
BAYLOR COUNTY.JOHN T. RANSON, - - Clerk,
NAT G. MITCHELL, Deputy.

Seymour, Texas, _____ 189

North to N. E. Cor Sur No 18 and West
to E line 78 and S. to S. E. ^{Cor} 48,
I have not been able to do it
all yet. There are sunk points
about this part of the block
that are annoying, so much so
that it appears to be impossible
both to obey natural and artificial
objects used at the same time put in
all of the ^{feet of survey} surveys.

The S. E. corner of Sur No 87
identified by logs & bearing tree
is 1700 vs West and 1756 vs South
^{var 02 30'} of a corner described as the S. E. ^{Cor} 56,
56, identified by both cotton wood
bearing trees and Gops in situ,
and 56 is 2182 vs long N + S, and
55 is 2741 vs long N, + S, on E. line.
The N. E. Cor of 118 is just six miles
N 81 W of the N E Cor 10. (no excess / var 9° 30'
The branches called for on S. line 118 are
on S. line.

Now if the N. E. Cor of 87 is immediately West
counter 14078

$$\begin{array}{r} 49,21 \\ 2741 \\ \hline 2180 \end{array}$$

Seymour, Texas,

189

of and a little north of the ~~S.W.~~ ^{S.E.} corner
 Survey No 56, then it would appear
 from one point of view that
 the ~~then~~ 3rd tier ^{is} knocked out,
 and will be knocked out if we ^{place}
 90 91 126 + 127 etc West ^{with 2 line of} 55
 and 89. 92. 125. 128 etc West ^{with 2 line of} 56.

these tiers ^{being} 247 ~~2~~ 741 etc and 2180 etc
 each, the same as 55 + 56, are on E. line.
 But on the other hand if the N.E. corner 87
 is West (or about West of ~~56~~ S. E. corner 56
 then the S.E. corner of 88 is there also,
 and the same dist on the East lines
 of surveys Nos 65 + 56 = 4921 etc must
 be divided among 3 surveys.

But in making corrected Field notes of 126
 I did neither for these reasons.

First the E side of 18 is 1900 etc long,
 and " E side of 17 ^{or 16, either} is 950. " " according to
 W.A. Jones. I forget which.

2nd " The field notes of survey No 54
 on Wine reads as follows.

DISTRICT AND COUNTY CLERK,
BAYLOR COUNTY.JOHN T. RANSON, - - Clerk,
NAT G. MITCHELL, Deputy.

Seymour, Texas, _____ 189

" Thence South at 200 rods cop. per hill, at
 440 rods br at 500 rods cross Huggens
 creek at _____ rods leave valley
 all of which we find exactly correct,
 to this point but have to go on
 2741 rods before we find the corner,
 for which reason I make this tier 1900 rods long, N. 1/2 S. 1/4
 It is evident to my mind the Callings
 at the N.W. and S.W. corners of ~~53~~ 53
 should have been at the N.W. & S.W. corner
 of 62, ^{Because you} Take notice that we cross the
 river on E line of 87 approximately
 as called for in field notes. Turning East
 on ^{line 58} we cross bend in river and
 find crows in bend of river ^{like}
 that ^{described} described in field notes of 57 & 54 & 52
 except going further east on W line 52
 I do not cross river, but Well I don't
 know just what to do. I wish it was in
 your power to send some man (like Cross)
 to help search this out, I attach with this
 a plot showing as near as I can
 the position of these corners, I plot the surveys

square and give length of lines as they appear to me.

I will go out the ground again next week and measure the East line from No 10 to 18 and also the distances from W line of BEM to Haggards Creek at W. line of 55 & 90, and report to you.

Yours Resp

A. D. Kerr,
