

State of Texas,
County of Bell

To Comr G. L. O.,

Dear Sir the above is a sketch
of the several surveys therein mentioned
This sketch should have accompan^{ied}
the corrected field notes of surveys
No. 10, 11, 12 & 13 mailed to your
office by Mr W. R. Hayes, of this county,

The lower or S.E. cor of the Geo B. Hurst
survey was established by a decree of the
District Court in this Co some years
ago, but the upper line of said
survey cannot be established as
shown in the sketch by natural
or artificial corners or lines;

The owners claim that the upper
line run near a noted mill
and that is the only ground

upon which they claim the upper line, My opinion is this that when the survey was first made it did run as now shown, but several years ago a resurvey was made of the Geo O'Sherity survey and the S.E. or lower corner was then made, The J.T. Malley and the Pat O'Boyle surveys not having been resurveyed at that time, now I do not think they should claim the lower line of the resurvey and the upper line of the old survey, I believe the upper line can be established where it now is by the meanders of the Paristw creek if that be sufficient evidence to identify a corner, this is a point in law I do not know,

Will you please give me some light upon this matter.

I wish you to make this correct ⁱⁿ in the field notes of Sur No. 12, the last course of A277 reads, "at 2923 is a stake" it should read, at 2402 is a stake,

Please inform me and I will

make the correction in the records,

Will you be so kind as to
inform me which of the surveys
of the Geo O'Sherity Survey will have
the original or the resurvey,
if the original line be adhered
to the upper line is correct;
but if the resurveyed line be
adhered to the lower line is cor-
=ect. I have written this as
explanatory of the matter, and
ask Council in the matter,
hoping to hear from you soon
I am Respectfully

J. B. Atkins
Snr Bee Co

P.S. I will give a certificate that
the above sketch is correct on the
ground of record, J. B. A.,
