

Beerille March 11th 76

To Com G. L. O,

Dear Sir the
reel sketch on the opposite
side will show you the rela-
tive positions of the several
surveys named therein as
they are upon the ground.

It also shows the co line
as it is upon the ground
The McChesney surveys have
been abandoned and the land
located by Mr Turner.

I hope this sketch will
be of service to you, it
may not be exactly
correct in every particular
but nearly so. I am sure
the co line as represented
in your map is so to for
east the whole length of
the line. I know that the
Frazier surveys in the S. E. cor
of the co are almost if not
entirely in Bee Co.

Very Resply

J. B. Atkins
Sur Bee Co

for Mar 20 76.
