Austin Texas

Dear Sir.

I have just made a survey of the distance from the Poista Creek across to the Medio as follows viz,
Beginning at the S.W. corner of the Anne Burk, which is also the S.E. corner of the James Hefferman Survey, Thence N63½ E 9769 was to the N.W. corner of said Burk. Thence N85 E 5080 was to a corner in the East boundary line of a survey in the name of Juan Maria Planes, on the left bank of the Medio Creek, which serves for the South corner of a Survey for John Sharp and also for the West corner of a Survey for J. W. Hahsel. The Creek at this point being 100 was in width and its Course S30° E - I hope this will enable your Draftsman to proceed with the map of this County, and to point out the discrepancies in the field notes of some of the old Surveys. As the matter now stands, it is very difficult for me to make satisfactory Surveys - I have no map, and am anxious to get one as soon as your Office can supply it.

Very Respectfully

J. F. Penner

Surveyor Bee County
