Apr 26th 80

Comr Gen L. O. Sir our Co Surveyor informed me that an explanation is wanted in your office of some surveys lying South of surveys No 5 and 6 Bu Co School Land. So I have now found out the whole cause of the discrepancy I have thought I might better explain it to you than he, I made all the surveys South of Bu Co S. L. No 5 & 6. But after having made all these surveys - I found out that all the trouble originated in Survey No 4 Bu Co S. L. it not being square but in the form shown above - The North boundary line of Survey No 4 run to a point more than 200 varas south of its proper corner - hence all the connecting surveys N. W. of it - are more than 200 varas south of their proper position. Hence Sur No 6 Bu Co conflicts with C. C. Ditch Scrip - and not the Ditch Scrip with the State Sect South of it -

Very Res J. B. Atkins
