

OFFICE OF

H. C. McCLUER

CIVIL ENGINEER

282

Hon. J. T. Robinson
Austin,
Texas.

BOGATA, TEXAS, 12-16-1927.

Dear Sir,

The wagon axle corner mentioned in your letter of recent date, when you saw it in writing up the Patent notes of Mr H. J. Kames, is moved East, there will be no witness for it, the corner will fall in open ground. Mr Sims, present owner of Davis Co, says my survey and report is correct. That the Survey 80, or is it is now known, The Welch 80 is wrongly located on the grounds. It should go East 140 rods as I put it in my report. Mr Kames has been very ill - I enclose his last letter to me. He is a very fine honest old man, I wish there were more like him. What is the status of the Smith groves in Sec 76-79 P. Ry. in Davis Co. I have his fence field notes written up in due form, ready to send in when I hear from you.

I wish you and the office force a happy Xmas,

Yours

H. C. McCluer.
