REPORT OF A SURVEY OF SECTIONS IN BLOCK LO, GH & SA RY, IN BREWSTER AND PECOS COUNTIES.

JERRY SADLER, COMMISSIONER GENERAL LAND OFFICE AUSTIN, TEXAS 78701

Dear Mr. Sadler:

I have recently surveyed and prepared Corrected Field Notes on Sections 233, 235, 237, 238, 296, and 297, of the captioned Block for Texas American Syndicate and Mr. David McGill.

The West and South lines of this group was surveyed, by me on the ground in October 1968.

We began this survey at the oroginal Rk. Md. at the common corner of Surveys 291, 292, 295, and 296, and by <u>chain</u> we found the distance to the common corner of Surveys 297, 298, 301, and 302, an old rk. md. marked NE297, to be <u>3821.6 varas</u> (Stovell-3824 varas.)

We located the common corner of Surveys 234, 235, 297, and 302, marked 201 Lod Office NE235. This rock mound is under the East-West fence which forms the South line of a long used sheep pen. Mound appears to be in its original location, and no other mounds and rocks are evident. By triangulation we found the length of the North line of Survey 297--1878.2 varas. (Stovell- 1922.5 varas).

The old rock mound under the above mentioned East-West fence, marked NE236, the common corner of Surveys 233, 234, 235, and 236 appeared undisturbed.

From NE236, we found NQO 20'E. 1897.6 varas, by triangulation, andeld rock mound marked NE233 in which some later surveyor had driven a 2" square steel rod. From NE236 there was also an old fence corner post with guy wires-N.O •10'E. 1902 varas.

Field notes and plat of the above survey were delivered to Mr. David McGill August 4, for forwarding to General Land Office.

Yours very truly, J. J. Carney, Jr.

Licensed State Land Surveyor Box 641 Alpine, Texas 79830
