Childress, Texas. 5/16/17

Mr. J. T. Robison Com. Gen. Land. Office
Austin, Texas.

Dear Sir:-

I am sending you herewith corrected notes of the Childress County scrap land.

I wish you would send me a copy of my sketch of these lands so that I may when I can find the time make the necessary corrections.

In regard to the enclosed notes I wish you would take some action on them as soon as possible, I would like also to say that I think you can do this without having the above mentioned sketch corrected, for the reason that when same is corrected, that part which shows the enclosed notes will not be disturbed.

In the notes of Survey No. 102. Block "C" I notice a note on the back to the effect that the notes do not close by an error of 9. varas in latitude, I can not understand this for the notes state a South call of 154.3 varas another South call of 33.7 varas making a total of 188. and the one North call is 188. varas.

Hoping you will see fit to follow my suggestion in regard to awarding the land covered by the enclosed notes, I am,

Yours very truly,
