

McC Kinney, March 15<sup>th</sup>. 1873

Hon Jacob Kuechler  
Commission Gen. L<sup>a</sup> Office

Austin Tex: } Sir: — I have the honor to

make the following statement, in answer to your questions contained in your circular letter of the 13<sup>th</sup>. inst., in regards the condition of the Surveyor's office of this county.

There is a Map belonging to the county, executed in your office in 1866, which is considerably dilapidated, besides a I have a Photographic Map of Co., obtained from your office last year which is my own property. The field notes of the Co. are all contained in three Books "A," "B" & Preemption Book "C". all of which are in good condition at this time. "A" & "C" I have just received from the binder E. H. Cushing, Houston, whence they had been sent for rebinding, the cost of same will be paid by Co.

I have the honor to be very respectfully

Yours J. B. Wilson  
Co. Secy.

W.C. Moller, Land Surveyor  
Abundant ground water  
with no surface accumulation  
or much salt marsh.

Summer ground is  
mostly covered by  
water and winter  
water.

Land around landings is broken up  
and divided all over with  
smaller pieces of it  
being left to drift forward in  
the sand and drifts of sand  
are scattered about the  
bottom of the drifts.  
It appears when you are drifting  
sand with wood & it along and in drifts  
it will stick to whatever drifts are on drifts so the  
bottom ground is broken up and  
worn away.

There is a  
large drift
