

San Antonio April 4-1859

Hon. J. M. White, Comm^r G. S. O.

Dear Sir,

Enclosed please find a sketch showing the distance between certain surveys lying south of the Concho, on the waters of Cotton Wood Creek, and the bank of that stream, from a return made of lines run on the ground by Wm Sharton Deputy Surveyor. I think there is a clerical error in writing the length of the most easterly of the connecting lines. The other two lines I think can be relied on, at least to the extent of their showing there is no conflict between surveys 2205-6 and the river survey. I enclose this sketch at the request of M. H. Bowers Esq, who informs me, that there seems to be a conflict on the maps in the G. S. Office, between survey 2205, Dist 11, and the Concho surveys.

Yours respectfully

J. Giraud
