

The above sketch of the work on Cottonwood Creek a tributary of the Concho River, was returned to this office by Wm Skanton, Dip Sur. The N. E. corner of survey no 1602 is set S. 65 $\frac{1}{2}$ ° W. 3300 rods, from the S. E. corner of survey no 133, fronting on the Concho. Some of the surveys, adjoining the river surveys have been returned to the S. E. Office with an erroneous connection. The figures in red ink show the lengths of the lines calculated by the true connection.
