

State of Texas }  
Frost County } 4  
Connecting lines run and measured  
by me. in San Green County, Texas  
I began at the main water  
"Falls" on the F. & P. Rail road at  
the Monahan Well, and ran.

Thence, N. 73° E. with the line of the  
said Rail road, (variation 11° 15' E.)  
950 varas.

Thence S. 17° E. 9,500 varas (5 miles)  
to South line of Block "N." Maddox Br. + Anderson

Thence, S. 73° W. 13,300 varas (7 miles to  
the S. W. corner of Block "O" made for  
Gunter Munson Maddox Bro. + Anderson  
at this point I found an Earth  
mound near the road leading  
from Monahan to Falls of Pecos.

Thence from the S. W. corner of  
Block "O." I carefully ran a  
connecting line to the lower corner  
on the Pecos river of Survey No. 1  
in the name of "Cove" from which  
the "Guate falls of the Pecos" a very noted  
and unmistakable place, bears  
N. 38° W. 607 varas, at this corner I  
found a stake - recently set in a  
stone mound. From the S. W. corner  
of Block "O." as above ascribed to the  
said corner of No. 1 name of

Howe, I found it to be S. 44° 45'  
(Eleven degrees and forty five minutes) W.  
16,700 varas.

From the said Corner of No. 1 name  
of Howe I ran a connecting  
line to the lower corner on the  
Pecos river of Section No. 1 Block  
No. 1 made for the N. & T. C. R.R. Co.  
this corner is a short distance above  
the Horn head Crossing, and is well  
known to me, - as I made the original  
survey, - by actual and careful  
measurements. I found that from  
said Howe lower corner, to the  
lower corner of said survey No. 1  
made for N. & T. C. R.R. Co. it is  
East, 55,532, varas, and South  
17,930, varas.

These above and foregoing  
connecting lines were run  
and measured on the ground  
Beginning on the 23<sup>d</sup> of June and  
finishing the 2<sup>d</sup> of July A.D. 1884
