

EUROPEAN PLAN

The
DRISKILL
AUSTIN, TEXAS,
W.L. STARK,
MANAGER.

October 27th, 1925

Hon. J. T. Robison,
Commissioner General Land Office,
Austin, Texas.

Dear Sir:

On about September 21st, 1925, I filed in your office a plat showing portions of Block BB, E. L. & R. R. Ry. Co., Blocks 1 and 2, GC&SF Ry CO., Block HH, and Blocks 5, 6, 7, 12, 13 and 14 University lands; also field notes of the P. L. Childress vacancy survey #1, block PP 2, corrected field notes of the Maria Hernandez survey #70, and a few days later corrected field notes of the Ben C. Rains survey #12.

Since filing this plat and field notes I discovered in rechecking my field work that I had made an error in the plat, and consequently in the notes. I immediately wired you asking you to suspend any further action on these field notes until I could make a new plat and field notes to conform to these corrections.

I herewith hand you corrected plat and corrected field notes of the P. L. Childress vacancy survey #1, Block PP 2, the T. J. McLaughlin survey #54, the M. M. Strickland survey #8, the James Lout survey #6, the Benjamin C. Rains survey #12 and the Maria Hernandez survey #70. I also enclose the original field notes of the P. L. Childress survey #100, made by virtue of his application and affidavit to purchase unsurveyed school land.

The principal error in the first plat is the fact that I overlooked part of my field work and represented the north line of survey No. 32, block 1, running directly east from the northeast corner of the Richard Pillow league to be 1918.2 varas, which, according to my report of the actual survey on the ground filed September 21st, 1925 (q.v.) should be 1950.3 varas. This affected materially the width of the Maria Hernandez survey #70.

A slight error in representing the different variations of the large blocks, which on the new plat is worked out by actual

EUROPEAN PLAN

The
DRISKILL
AUSTIN, TEXAS,

W. L. STARK,
MANAGER.

J. T. R. # 2

measurements on the ground instead of by direct reading of the vernier of the instrument is more nearly correct, and consequently necessitated some minor corrections in all these notes. The different variations indicated on the new sketch are more for the purpose of representing the differences in variations than for the actual variations. Recently I have found it to be a fact that at the Quart Can corner, at the S. E. corner of survey No. 43, block BB, True North from the north point established from the recently corrected wind mill bearings of this corner, is West or to the left, 0° 26'.

The dotted lines in blue connecting Quart Can, N. E. and M. W. Pillow League, Forbes at S. W. Block 7 U. V., and stone mound 15 varas south of road on East line of Block 13 U. V. corners represent the result rather than ~~the~~ actual survey on the ground. *of an*

Yours very truly,

Frank F. Finner

County Surveyor,
Crockett County, Texas.
