General Land Office

Dear Mr. Shirriffs:

The enclosed print is being sent you for your possible information.

GLO maps, ownership maps, and original survey notes indicate that the North line of the Tanzy and the Williams Surveys continue East-West in a straight line, and extend beyond them East & West.

Before making this survey an examination of aerial maps indicated that on the ground the lines definitely did not jibe, so we sent to you for a working sketch.

As the survey indicates, the error was probably made on the Williams survey. The lines as shown on the plat are definitely established and have been for many years.

Unless it becomes oil producing, or something else makes it valuable, it would a useless expense to carry the survey any further at this time.

Very truly yours,

C. F. Ballard & Associates

Attention: Mr. C. F. Ballard

Dear Sir:

This is with reference to your letter of April 29, 1960 with which was attached your plat showing the construction as found upon the ground of certain surveys located in Denton County.

We appreciate the receipt of your plat, which has been designated "Denton County Rolled Map No. 4", and will be available any time if and when required.

Your letter is also being filed with the plat.

Sincerely yours,

BILL ALLCORN, COMMISSIONER
