

131  
Victoria Texas Oct. 9th 1894

Hon. W. L. McLaughry  
Austin Texas  
Dear Sir

I enclose plot showing the  
true position and original location of  
said land as they appear on the ground

Take Block 1, H & G. R. Ry Co as surveyed by  
L. E. Wise and all surveys that take there

beginning on said Block I find to occupy  
the position as shown by said plot

The C. W. Connelle Block of land occupies a  
position west of its collars to connect

with Block one H & G. R. Ry Co as called for  
in field notes. Take the south west cor of 207

A. B. W. and all land that was located at the  
same time as the same

was located the year 1875; The Shock & Arnold  
Block occupies its position on the ground

as shown by the plot and agrees with connection  
from 207 A. B. W.

I find all lands located in 1876, as shown  
by plot called to connect with said land

surveyed 1875; I found the ground work  
shows that these positions 1340 East and 986

North of where they call for which causes a  
conflict with the land on the East the

Shock & Arnold Block conflict with the  
land on the west the official Land maps pull

it low 1340 West and 986 South and as the  
plot shows would close up to dotted red line

The Matadore Company who now own
