

West from N. W. Corner of Johnson Survey.

The S. E. and S. W. corners of John W. Johnson Survey - and a line parallel to his North line at the distance of 2100 Vrs, <sup>(Field notes call for 2192 vrs, must 2100 as here sketched)</sup> (as called for in his field-notes,) is 290 Vrs North of the North boundary of Francis R. Lubbock Survey, so that instead of a call for the N. W. corner of the Lubbock Survey to be situated on South boundary of Johnson Survey 1530 Vrs West from his S. E. corner - it should be 1530 Vrs West and 290 Vrs South - leaving a vacancy 290 Vrs in width between the two surveys - as represented in accompanying sketch. The Lubbock survey begins 1530 vrs west of Johnsons S. E. cor.

The surveyor must state official, that he finds the N. W. cor. of Lubbocks survey & S. E. cor. of Johnsons Survey on the ground, both are established by bearing traces and give course & distance between the two corners. The State of Texas

Palo Pinto Land District.  
J. Peter Davidson - District Surveyor for Palo Pinto Land District - hereby certify that the foregoing sketch and statements give correct connections between all the surveys therein named - and that the lengths of lines marked on boundaries in sketch - and also the length of connecting lines have been ascertained to be correct by actual measurement in the field.

Subscribed and sworn to by me this  
11<sup>th</sup> day of July 1872.

J. P. Davidson

Eastland Co July 11<sup>th</sup> 1872

Messrs G. R. Johns & Co }  
Austin Texas }

Sirs - Will you please hand enclosed sketch to the proper officer in L.O. and request him to give it his attention as early as possible. We have a considerable amount of work that has been delayed for a long time on account of appearance of conflict on L.O. map. - but all the lines of accompanying sketch have been chained - some of them several times.

Will you please ask the officer - if there should be any other trouble with the late work in Eastern part of this ~~county~~ make a statement of it to G. P. Davidson or myself - so that we can push our work through without more delay than is necessary.

Very Respectfully  
G. W. Holt
