

Dr. Sir: I give you the connection between
the S.W. Cor. of Sur. 71. S.P. Ry Co. and the N.W. Cor. of
Sur No 1528 in name of Ed. Hughes, on the
Aris at Leakey. - Beginning at a S. Md. on the S. Bank
of E. Mueces. (all three witnesses are standing and marked)
Thence to a point - 1363 7/8 v^r. S and 955 6/70 v^r East
for the S.W. Cor. of Sur 77 Bl. 3. T W N. G. Ry Co. and N.W. of
McI. Bl. F. G. H. 25 S. A. - Thence East 8 miles for N.E. Cor.
Sur 8. Bl. F. Thence S. 3800 v^r for S.E. Cor. of Bl. 11. Thence
East 3800 v^r for S.E. Cor. of Sur 20. Bl. 12. P W N. G. Ry.
Thence East 513 3/5 Thence S 54 1/2 to 458 v^r to the N.W. Cor. of the
Ed. Hughes Sur. # 1528. both witnesses standing and marked.
which is about 300 v^r S and 300 v^r W. of Leakey which is
situated on Sur 1529. Ed. Hughes. I find that - the point
from to by me for S.E. Cor. of Sur. 20 Bl. 12. is 94 v^r.
South and 170 v^r West of the N. E. Cor. of Sur 20. as
surveyed by Reeves, a former S. P. Surveyor of Edward
Co. and by which Sur. the said Sur 20 was improved
by Watkins also the other school numbers which
were sold. are improved by the Reeves Lines.
You will see from the above that - my connection
moves these surveys 1806 v^r N. and 170 v^r West.
Now this is a fearful difference to be made

as pointed out to me by sellers there, but no one
could tell me where a mile post ^{or monument} could be found.
I wish you would compare this connection with
what ever data you may find in Land Office and
see what is the matter? and let me hear from
you? I cant help but believe that there is a
mistake of one mile in Reeves' work.
My survey will play the D.L. with the
Carolin Mines

My P.O. will be Ellis. Edward Co.
which is on Bl. 11. S.W. T. & P. on W. Mueces
I will move over there in about one
week.

Yours Truly

J. M. Williams

The S.E. corner of No 20
as made by me, was
made by a run at a
va. of $93\frac{1}{2}^\circ$ E. from S.W. cor.
71 on Noneses River -

This corner if made
by a run at a va. of $91\frac{1}{4}^\circ$
would be $247\frac{1}{2}$ S. S
and $148\frac{1}{2}$ W of where
I made it -

Mr. E. von Rosenberg
Austin Tex.

71. - I could not learn whether Reeves ran
from Sur 71 or not. I made my survey with the
utmost care and was 9 days making
the survey, and all the outs were kept by
two parties at same time so as to avoid a
possibility of ^amiscount - and there will be no
error found in my work. From the N.W. cor.
the said Hughes Sur it is 448 vs to the
