

Field-Notes of a Connecting line made between the C.M. Corner of Survey No. 6, East Line of Red River R.R. Surveys made by David Clarke in 1879 on South Plains Survey made by virtue of Certificate No. , and the East-Corner of Survey No. 14 made for Washington County R.R. Co. by virtue of Certificate No. Surveyed by Sackett in 1874, & situated on South Plains. Said connecting line beginning at the said C.M. Corner of Survey No. 6, E. L. of R.R. Co. a small rock mound from which a line oak 18 in dbd \square was S $47\frac{1}{2}$ E. 36 varas a line oak 12 in with similar marks was N $45\frac{1}{2}$ W. 32 varas. Said corner is about four miles below the McKenzie crossing of South Plains on West side of Creek.

Thence S 45 W. 4464 varas crossing South Plains near end of course Thence S 63 E. 38 varas a small rock mound from which a line oak dbd X S.O. 12 in in

line between S 41 N, 94 W or S, (original field notes makes distance 79 rods) a mesquite 6 in diameter S 44 E, 41 W, both trees clearly marked -

In proof of the correctness of the above connection, and of the identity of the above corners I traced a line west from the N.W. corner of Survey No. 6 E. S. & R.R. Co. and found the lines marked on trees and found the corners in substantial conformity to the field notes of the same -

I also have found the corners of all the surveys of Washington Co. R.R. Co. Nos 14, 13, 16, 17, 18, 19, 20, 23 & 24, on South Lewis and found the same to be substantially correct -

The above connection was made on ^{or about} the 25th day of June 1881, { Robert McKinnell
