

Waco 29 July 1853

I certify that I found the west line and actually resurveyed the same and found it to be 206.5' across instead of 1900 and the south line in proportion with those the palony surveys about 500' more or less there exists no conflict whatsoever the survey of Wm Cannon 196' was made twice it will be found patented in the genl land office in some other part of this but it is a part of the same
