I have, by actual measurement, established connections between the surveys on Red River and Coffee Mill Creek as follows:

From Robt Damall S.E. corner – N. 75° E. 663 vrs. & S. 47 vrs to G. Kerr's N.W. corner,

" Julius Buttacks N.W. cor. E. 25 vrs & N. 6° W. 66 vrs to T. P. Humphries S.W. cor.

" T. Tomerraity's N.W. cor. E. 622 vrs & N. 6° W. 303 to Jas C. Williams S.W. corner

" " " N.E. do S. 45 vrs and E. 27 vrs to T. S. Smiths S.W. cor, & find T. S. Smith's S. line 2631 vrs long instead of 2580 as appears of Record

From T. S. Smith's S.E. corner to Alex Russells S.W. cor. N. 974 and E. 758 vrs. Russells S. line measures 2701 vrs. instead of 2793 as appears of Record. this is wrong - the fieldnotes say 2393.

Russells S.E. cor. is 70 vrs North of J. G. Jones S.W. cor. instead of 60 vrs as appears of Record

W. A. Burns S.E. cor. lies S. 478 vrs W. 789 vrs & S 15° E 157 vrs from J. Buttacks N.W. Corner, making the space between R. Kerr & G. Fitzgerald & H. G. Sadler, occupied by Smyers, on Smyers S. line, 1170 vrs. instead of 1032 as appears of Record

Given under my hand 9th March 1866
