Map showing
 Site of U.S. Life-Saving Station
 on
 East End of Galveston Island, Tex.
 1886.

Mean rise and fall of tides about 1 ft.
 The point is subject to overflow during
 gales. The bottom is fine sand and
 broken shells, subject to frequent
 changes.

The "Government reserve" of 1836 was
 eastward of the present one which is
 due to accretion.

Scale 1000 500 0 1000 2000 3000 feet
