Honorable J.H.Walker,
Commissioner of General Land Office,
Austin, Texas.

Dear Sir:

Mr. O.A. Stovall, a licensed State land surveyor, has done considerable surveying in the area of Dickinson Prospect in Galveston County, Texas. You will recall that you requested field notes showing the amount of acreage and the description of the additional acreage which we think should be advertised for lease by the Land Commissioner. Mr. Stovall has prepared field notes of the area and a plat showing the location thereof. I enclose these to you herewith. I do not know any authority of law under which this survey could be made unless the Land Commissioner has authority to request a licensed State land surveyor to make a survey of this character. If you have such authority, you may desire to have these field notes recorded in the Surveyor's Records of Galveston County. If so, of course, you can forward them to the County Surveyor for recordation before formally filing them in the Land Office and noting your approval thereon.

I understand that the field notes and map have been prepared on the basis of an actual survey checked against the airplane map. I am not so sure that they do not include, however, some marshy areas which are alternately bare and covered by water. I believe they do mark the limits of mean high tide.

If, as a matter of law, the lines of the abutting surveys should go at any place within the limits of these field notes, no rights of abutting owners under the grants heretofore made would be lost as a result of such conflict. In other words, they would have priority over any grant that may be made by the State on the area included in these field notes where there is a conflict. So far as I know, however, there is not a conflict for the reasons stated above.

Yours very truly,

RECEIVED

Rex G. Baker

Houston, Texas, September 13, 1934.

FIELD NOTES of a survey of 264.2 acres of submerged land along Dickinson Bayou, Galveston County, Texas, said bayou being a tributary of Dickinson Bay about 20 miles northwesterly of county site.

BEGINNING at a galvanized iron pipe 1-1/2" in diameter, same being the northwest corner of a survey of 372.4 acres of submerged land along Dickinson Bayou made for S. C. Hammerly by J. C. Carrington, September 3-7, 1929, from which the right hand end of Crawford Johnson's house bears North 66-1/4° West, and the east end of D. H. Weave's house bears North 26° East, and a lone tree bears North 17-1/2° East.

THENCE South 33° East 683 varas with the West line of the above mentioned 372.4 acre survey to the southwest corner of same, being a point on the south side of Dickinson Bayou.

THENCE up the said bayou with its meanderings as follows:

S 60°	W.	299	varas
