SNYDER, TEXAS Aug. 14 1907

Received as stated \$ 300

AUG 16 1907

W. B. ANTHONY
RECEIVED

Hon. John J. Tassell
Comr, Genl. Land Office
Austin Texas

Dear Sir

Enclosed herewith I hand you
Applications and field notes for three surveys,
two for John B Slaughter, and one for W. A.
Rogers. These vacancies was shown up according
to W D Twichell's survey, I dont think it is
made according to the locating surveyor, or
the original survey, especially his work on
block 8 T. T. Ry, Co and block 30 T. T. R., I cant
understand how he can ignore such a plainly
defined corner as that at the N.E. corner of Survey
No. 1 Brooks & Buskison the N.E. corner survey,
in block 30 T. G. R., and also the N.W. and N.E.
corners, of Survey No. 1 block no. 30 T. T. R. made
for T W R & Ry, Co, also in making Survey No.
27 Jasper Hays, 1638 vs, wide at the north end
while the field notes, (original) only call for 540
vs, on north end, I believe it is radically wrong

THE STATE OF
TEXAS,

and that it will cause trouble some day,
these are not the only corners I know of.. in
Garza County that are not in the original
position as placed by Mr. Twichell, corners
that I was familiar with more than twenty
years ago, one in particular, the Northwest
corner of Section No. 42 block No. 5 - G & H & K R R Co,
on the Yellow House River in Garza County,
I done work from that corner over twenty years,
ago at that time the Stone Mark was in position
on North side of River, trees with marks was then
standing, now the position of Stone Mark as it
stood there is in the middle of the channel
of said River, I give this information in
order that you may know these facts

Very truly yours,

Hugh A. Goodwin

Surveyor

Conroy Land District
