

State of Texas  
County of Hays

I certify that the above sketch represents the partition, of the several surveys; determined by me by actual survey; on the South S. base my work on the Jacob's survey; having found the clearing; to S.E. corner, to wit a L.O. 8 mi. to E 20, or a Reader 12 mi. N 44 W 45 - The N.E. Corner a L.O. 8 mi. to S 4 W 35 - and the N.W. Corner a L.O. 8 mi. to N 37 1/2 W 32 and to N 5 1/2 E 25, us; I determined the S.C. Hubbs & S.D. Overland, by running calls from Jacob's Well, and connected the ~~Witt~~ Durgeson as per plat I find that the Call. of the Durgeson for white is 85, was error I find that the R.B. Gregory Conflict, with the E. Sneadley 297, us; and space between line A.B. and S. line of Overland 57 1/2, us;

Phys. Co. 58. File #7

and that the lines of c/o. A. Turner  
as now recognized by the owners is  
run with out variation; that the  
lines run 10° to the right of it;  
and that the line running west from  
S.W. Corner of A. Turner, to the  
S.W. Corner of H. E. Vortner was  
short 480. vs. by actual measurement  
that the Wyley Hughes 2041 + C Overland  
2046, short, running west from Bri Blane  
over 400. vs; and running north over land  
is short, vs; and space  
between Wm Stuart + John Norman  
= 1664. from S.W. Corn of the Dr.  
Kelley to the S line of the Jack-  
son sq. = about 1800. vs; with  
setting the line 445. vs East  
from the S.W. corner.

In a few days will make actual  
survey of space between K + J.
