Old Survey.

Original corners & witnesses by which such corners could be identified were found as shown on sketch accompanying field notes.

On Clear Fork the survey was given their full depth East & west on their north line and their Record width North and South except where original corners were found. The work was put in from the North.

On Elm Fork the surveys were given their record depth on the East line and their Record width East & west except where original corners were found. The work was put in from the East.

Charles H. Irwin

Principal Surveyor

J. P. Newlin.
