Hon Andrew J Baker

Dear Sir

Replying to yours of 12th inst,
I beg to say, that I neglected to note
whether the call of Rufus Wright for the
Helena + Forttown road + the head of Cabeza
Cruz are right or not. If you notice
the field notes of the sec 37 Indianola Ry led
Sec calls at 1176 vs head of Cabeza Cruz,
and at 1870 vs the south line of the Lytle
Ry. This survey (sec 37) was made by
Mr G H Hartmann former County Sur-
of this Co and I am inclined to think
the call for the Cruz road as given
by him approximately correct. It is 30
miles from Cuero to this particular tract
of land and I dont want to drive

out there ~~there~~ to make these measurements
unless you think it absolutely necessary,
But I will do as you think best in the
matter, You never answered my
question as to priority of right to
purchase, Hoping to hear from you
soon I remain

If the statement of facts are correct as
regards corners found on the grounds
of Davis, Whetton and Barrier Surveys,
establishing the North line of these surveys
South of the South line of Mrs L. Lytle sur-
