

Kaufman Co.

Henderson Co.

The above Sketch is made according to the calls in the fieldnotes of surveys represented. The corners marked thus are identical by description of bearings in the respective fieldnotes of adjacent surveys.

S. M. Carter's in-corner has not the same bearings as given for H. Hertz S.W. & J. Abel N.W. corners; said Carter's survey evidently conflicts with John Abel's.

John M. Patterson's survey purports to begin 700<sup>00</sup> South and 700<sup>00</sup> West of H. Abel's N.W. corner. Carter's S.W. corner lies 400<sup>00</sup> West of Abel's W. line. W. Laugherty's S.W. corner lies 400<sup>00</sup> W. of Carter's S.W. corner, or 800<sup>00</sup> W. of Abel's line; therefore 100<sup>00</sup> West of John M. Patterson's East line, inside of said survey.
