Explanation

The dotted Red lines show the correct position of the School land Survey on the ground

The Red line is platted from the field notes and Record here a certified copy of which is herewith forwarded The South East corner of A Russell is Standing which is the beginning corner of the Thomas Jamlinson

The North West corner of Joseph Deek which is also a corner of the Tho Jamlinson is Standing The North boundary of the Tho Jamlinson and South boundary of the School land Survey is a plain marked line through timber and is the line of the Bawerman perfected Survey called for in the School land field notes

The lines of the Tho Jamlinson are in timber and all old lines and corners are plainly marked The R F Parish, Jesse Owens and A J Stabler do not conflict with the School land as shown by the dotted Red lines the Error of the School land is in the length of the first line I have frequently petitioned the County Court to have all the School lands in the County corrected but they have never made any appropriation for that purpose

I do certify that the Thomas Jamlinson Survey is correct on the ground as platted from actual Survey Given under my hand at office July 27th 1872
