

J. C. Haralson County Surveyor of Lampasas County do hereby certify that this sketch is correct & that the surveys on Musquito-Creek are correct & that the S. J. Dobbins survey does not conflict with nor reach the Sarah Pennington Survey by 69 vs - as see the

width of the Daul, Glenn  $\frac{1}{3}$  & the Albert Rawson  $\frac{1}{3}$  League Survey they together are 4195 vs. & then the Dobbins Survey is 376 vs the Skein 950 vs the Hughes Survey is 950 vs - the Childers is 950 vs - The Dobbins 900 vs all making 4120 vs, & when I ran the Dobbins Survey I came to what I supposed to be the penning line from the marks & course - which marks had been made - with a view of making a Road which was not made & when I came to trace the pennington line from the corner I found to be 69 vs from where I stop, the Dobbins Survey - See the sketch above J. C. Haralson County - July 25, 1861 Surveyor Lampasas County -

File 4#

Lampasas County.

2-25-61- 3-9-61.

about 3 miles East  
of Lampasas.
