Commissioner
General Land Office,
Austin, Texas.

Dear Sir:

I thank you for your letter enclosing the Live Oak County Map. We think it will show what we need, but in order to be doubly sure we are enclosing the old Map dated in 1879, to which we referred in our previous letter, and will be obliged to you if you will attach a certificate to this map showing that it was a copy of the Official Map in use in 1878 or 1879 or whatever the time was. We are not particular about that, but merely want to show that it was the official map before the Banover Survey was located. What we are trying to show is that the location of the Banover Survey did not disturb the Wright and Buchanan Surveys, but that they were located at the same place both before and after the Banover Survey was located, and this Map taken in connection with your present Official Map will show that there was no change of location in the Wright and Buchanan. Of course, that is also shown by the Map that you sent in your last letter.

We will be obliged if you will send this Map to us at George West, Texas, by next mail.

If for any reason you cannot certify to this map and have a similar Map on file in your office which you can certify to, please do so.

Yours truly,

Denman, Franklin & Denman
