

Land Office Montgomery Texas January 8 1856

Honr S Crosby

Sir - Please find enclosed a sketch showing the connection of the surveys in Montgomery County on Spring Creek the surveys are

S J McFarland 287 acres

354 "

A. L. Bunner 160 "

160 "

Peter Mitchell 320 "

G W Cropper 320 "

It appears from previous attempts to obtain patents on the above surveys that the map in the G. L. O can't agree with accompanying sketches

On the ground I find the East boundary line of G W Cropper & Genee to be 3900 as long while calls in the records of this office 3820 being 80 as to long upon examining the records here I find the West boundary lines of the Cropper survey 740 as

States 640 as 1283

Helder in all 2017

now take from that 4040 as

3820 as

now as it stands above that the Cropper

is 80 as to long so we will take from 220 as

the over plus of the Cropper  $\frac{80}{140}$

we leave as that the

Helder survey passes the NE corner of the Cropper survey this shows why the Helder survey is 140 as further north than Cropper

now G. L. Stensberry's West boundary line is 2257 as

the Helder East 2017 as  
leaves 240 as

V

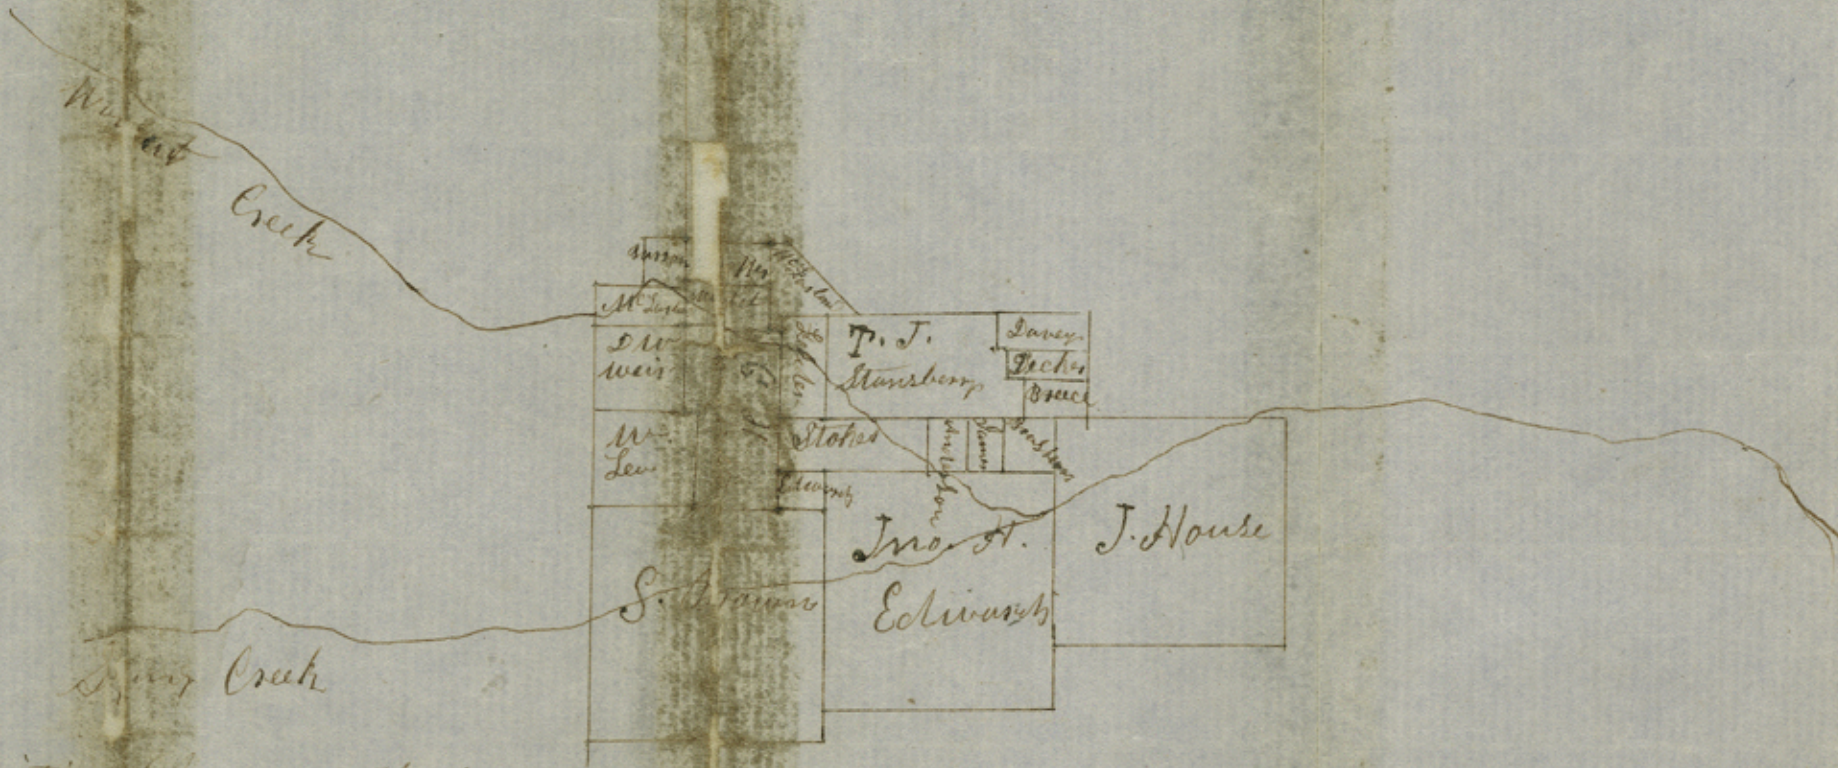

which shows clearly <sup>that the ~~Stanley~~ survey is 240 or</sup>  
further north than the ~~Felder~~ Survey all of which is  
clearly shown in the accompanying sketch  
The D. M. Salmon League is on the ground in the same  
position that it appears in the accompanying sketch  
The sketch is drawn on a scale of 2000 units  
and so as to show you the precise situation  
plainly now if anything does not appear right  
the sketch refer to your records and do not  
place any confidence in the old map and  
do not think you will find us far wrong

Yours  
Jos M Brown
