Memoranda. - The survey marked on map "Whelan
(now Harrison) conflicts with M. P. Hunter survey.
The former survey was made by Surveyors of Harris
County. The latter by Surveyors of Montgomery, and here
their works conflict, as ascertained on the field.

By reference to field notes of Whelan, it will be seen
that the S. W. corner of R. D. Chiles survey (forfeited)
is called for. This corner is represented on sketch by the
black mark within M. P. Hunter's survey, and has
been found. There is a continuous line running
West from the N. E. corner of the Terry survey on
Cane to the East line of Wm. Bruce's survey, 940
var S. 20° E. from its N. E. corner.

By reference to field notes of Bruce and Levi
James' patented surveys, it will at once be seen
that the present map in use is wrong, and that
the accompanying sketch is right.

The survey marked on map as Van Horn calls
for corner of Levi James calls for intersecting the
East line of Van Horn - Thence South with Van Horn
1240 var to Bruce's E. line 270 var from its corner; con-
sequently they cannot corner together as represented
on old map - nor do they on the ground.

Again the survey of Whelan calls for N. E. & S. E.
corner of Levi James, all going to show that no va-
cancy exists between Van Horn (now Matt Andersen)
and Levi James' survey. Wade, Surveyor
