

Plotted on map August 1847
C. C. Taylor

The following is a connection of John Taylor's and Jeremiah Latham's surveys on Richland creek viz. From the South corner of John Taylor's survey and the North corner of Jeremiah Latham's survey to the South West corner of William B. Bowen's survey and the South East corner of David Laughlin's is $S 45^{\circ} W$ 300 varas and $S 60^{\circ} W$ 1900 varas the adjoining surveys in Red Ink connected as is represented by the foregoing plot

J. C. Taylor a deputy surveyor for Robertson Land District do hereby certify that the plot and field notes is a correct representation of the connections set forth therein Witness my hand this 15th day of April A D 1847

I David B Mitchell District Surveyor for
Robertson Land District do hereby certify
that C E Taylor was a Regular appointed
deputy at the date the within connection
purports to have been made given under
my hand at office this 25th day of July
1847

D B Mitchell D.S. & S.

In regard to such of the 11 league surveys on Davisoto as have a connection with Andres Varela's Claim it may be well to state that though I have spent considerable time in searching I have not been able to find any corresponding lines or corners on West side of that stream nor have I found any corners on the E. side but only the marks described in the connection with about 300 varas of line. This line enters the timber from the Prairie on the E of Plummer's Creek and terminates abruptly at the creek.

It would seem that none of the corners of these surveys above Maria de la Concepcion Marquez's Grant have been established nor have the lines been marked any considerable distance from the River.

The lines and corners of Jose Maria Viscas, ~~the survey line~~ ~~have been established~~, the E & W boundary of Pedro Periera Jose Jesus Grande y Mariano Grande have not been established on the W side of the Davisoto
