I, J. S. Munson, being duly sworn do depose  
and say that as Surveyor under my contract  
with the State of Texas, to survey what are known  
as the Capitol lands, I did return to the Commis-  
sioner of the General Land Office, field notes of  
a league survey designated as survey No. 2711  
containing one league of land, which survey crosses  
and lies on both sides of the Canadian River  
in Oldham County, Texas; and further that  
I submitted a plat to the Inspector, Col. N. L.  
Norton, showing the projected plan for making  
that, with other surveys, before the lines were run;  
that he declined to decide the question as to the  
Canadian River being a navigable stream within  
the meaning of the law. I would state further  
that I crossed the Canadian River at many points in Oldham  
County and followed its meanders for several miles about  
the time and after making the survey, in said County  
returned by me and I am positive that the average width  
of water in the Canadian River was less than thirty  
(30) feet, and in my judgment did not exceed twenty  
(20) feet at that time. I state further that I  
easily stepped at one step entirely across the water in  
said River at one point in Oldham County and saw  
another point on said River in said County  
where I could have stepped across all the water at  
a single step, the water at said points being  
about thirty (30) and thirty six (36) inches in width  
respectively

From the facts stated said survey No. 271 is  
in my judgment legal, as reported and  
conforms to every requirement of the law  
governing my acts as Surveyor under my  
said contract with the State.  
Witness my hand this 3<sup>rd</sup> day of  
Dec. 1880 at Denison Texas
