

W. D. TWICHELL,

.....Surveyor.....

Texas Land Boundaries a Specialty

720

Amarillo, Texas, Jan. 1" 1904.

Hon. John J. Terrell,

Austin, Texas.

Dear Sir:-

Your favor of Jan. 6" by Mr. Patterson referring to block 11, Z 5, Z 6 etc. states that surveyor did not identify any original corners west of these blocks, but a careful examination of my field notes will show that I connected course and distance to the well known original monument at the N.E. corner of survey 4 block 7 and I connected by course alone to the monument at the N.E. corner of block 1 T T R R Co.

An original corner - well known - is shown at the E.W. corner of survey 1 block Z 6 and the surveys in block 2, Z 5, and 11 are made in strict conformity with a map which was filed in your office in March 1903, duly certified by me, show how Z 3 and M 19 joined upon the ground showing block 2, Z 5, 11, and block 7 with connections, upon which the vacancy between Z 3 and M 19 has already been awarded. This action and the facts upon the ground verifying the connections on this map, leave no doubt as to the construction of this land, and my field notes show connections to all original corners.

The field notes of block 8, and survey 2 H & G N R R Co. and 3 Indianola R R Co. have been corrected by me and approved by your office and the corners called for are shown to be the corners called for in the approved field notes. With this light in your office I fail to gather what corrections in my notes are possible, by what is said in your favor of Jan. 6".

The call in survey 16 block M 19 for two cottonwoods 12" S. 38° E. 47 vrs. is shown by old Oldham County records to have been made, from the creek crossing 1200 vrs. south from its N.E. corner. The original N.E. corner of 16 is well identified in my notes, the creek banks which are correctly shown make cottonwoods called, fall in creek and they are gone, and no cottonwoods
