

John McDaniel's survey; now abandoned.
I have in this sketch shown the exact situation of the J W Cox
survey of 70 Acres which you informed me conflicted with the
Yoast survey, as also his ^{McDaniel's} preemption survey of 160 acres
neither of which I hereby certify does ~~not~~ conflict with the
Yoast surveys. The J D H Richardson runs in upon the Yoast's
exactly as I have here shown it. I have recently found out
some of these confusions, and particular the Baly W Birdsong
survey, which conflicts with the Western Yoast survey and Land
Script survey of 227 Acres $\frac{7}{253}$ No. 2.

But inasmuch as said survey of Birdsong has been made
some time since, it may be necessary to return it, for the
following reasons, that the survey made for W. V. Duncan will
have to be corrected, consequently the field notes of Birdsong
cannot be properly made out until said correction is made;
so as to call for the Duncan Survey properly. As also that
Birdsong's interest might be lost if not returned before
Jan. 1864. The F M Campbell survey on the records in my
office, Read, Beginning at a stake 355 yds. N. 35 W.
from the N. E. corner of Land Script survey (No 237) (and
I have added these words. after No. 237) of 93 Acres. $\frac{7}{253}$
which please insert. ~~Yours L. S. E. M.~~ and so on.
the balance of the field notes certainly are correct.

I herewith send field notes of

Remarks, No 11 including a part of No 10 was made by N. C. Williams for John M. Daniel in a square for 200 Acres for preemption, since abandoned by him, and now taken up by F. M. Campbell as here laid down in No. 1. Laying the balance vacant. No 6, and 10 are two surveys recorded and laying as mapped, on Land script for 320 Acres 7/252. No 2 is 227 Acres, surveyed on Land script 7/250. and conflicts with the Yeast survey as shown. No. 5 is 93 Acres surveyed on the same script, which conflicts some with the Yeast survey, laying on the Sabine River. No 8, is the W. V. Duncan survey, which calls for
