

Weatherford, Parker Co. Texas
April 10th 1889

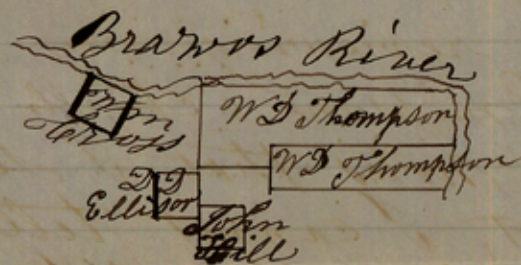

I Leveller, Murphy County Surveyor, Parker County
do hereby certify that the above
is a true sketch showing the
connection and relative situation
of the following 160 acre claims as
taken from the records of my office,
to wit; Thankfull Case, James
Hudson, Young Warren, Asa Gilmore,
Robert Turner, Lorenzo J. Turner,
John Turner, F. C. Brown, and
David Ferrin, all situated on the
waters of Grindstone Creek, a tributary
of the Brazos River. Dear Sir, I send
you the foregoing sketch in order to obviate
an ~~apparent~~ error into which you might
probably be led, by the map of
Parker County that I sent you.
That map would show an apparent
conflict between the John Turner and
F. C. Brown surveys, ~~whereas~~ whereas there is
actually no conflict at all on the
ground; The Lorenzo J. Turner and John
Turner surveys were made since I
drafted and sent you that map;
and since that time I have had
more correct information respecting the
precise situation of the surveys on
that point. I must likewise inform
counter 33533

you of an omission or two that I have discovered while reviewing my records. But whether those omissions actually exist on the original field notes that I sent to your office, or not, I cannot tell; they are the following, to wit; the Thankfull Case ^{which is one of the surveys in the above sketch} does not call for any ^(definite) connection whereas the connection should read as follows, to wit; "Beginning at the SW corner of a 160 acre presumption survey made in the name of James Henderson in the bed of Grindstone Creek on the North boundary line of a 160 acre survey made in the name of Young Warren". Now on my records it calls for no connection with the Henderson survey at all; therefore if the omission exists on the original field notes, please to rectify them, according to the reading above mentioned, as I have already made the same correction on the records. There is no other survey in Sparker county in the name of Thankfull Case. There is likewise an omission in the postscript or N.B., that I added to the 105 acre survey made in the name of Phillip J Stroud situated on the Brazos River. Said Stroud's survey actually takes in and includes all his improvements and I intended the N.B. to read thus, to wit; "The proximity of old surveys prevented me from surveying the foregoing survey in a square so as to take in the improvements." The phrase "in a square" was omitted in the records; please rectify it if necessary as I have done so on records. Very Respectfully yours &c

Lowellen Murphy County Surveyor Sparker County

April 10th 1859

I do hereby certify that the above is a true sketch showing the connection of the 160 acre presumption claims of William Cross, Draton D Ellison and John Hill with each other and likewise the two W D Thompson ^(as taken from the records of my office) surveys, they are situated on the SW side of the Brazos River and are the only presumption claims on that side of the River within the limits of Sparker County, that were settled and claimed under the act of the 26th of August AD 1856. The field notes have gone to your office long ago and I now send this sketch in compliance with a former promise I made you

Very Respectfully Yours &c

Lowellen Murphy County
 Surveyor of Sparker County

you of an omission or two that I have discovered while reviewing my records. But whether those omissions actually exist on the original field notes that I sent to your office, or not, I cannot tell; they are the following, to wit; the Thankfull Case survey ^{which is one of the surveys in the above sketch} does not call for any ^(definite) connection whereas the connection should read as follows, to wit; "Beginning at the SW corner of a 160 acre preemption survey made in the name of James Henderson in the bed of Grindstone Creek on the North boundary line of a 160 acre survey made in the name of Young Warren". Now on my records it calls for no connection with the Henderson survey at all; therefore if the omission exists on the original field notes, please to rectify them, according to the reading above mentioned, as I have already made the same correction on the records. There is no other survey in Parker county in the name of Thankfull Case. There is likewise an omission in the postscript or N.B., that I added to the 105 acre survey made in the name of Phillip J.
