Hon.J.T.Robison, Commissioner Gen.Land Office Austin , Texas

## Dear Sir,

I recently forwarded to your Office field notes for the H.C.Noelke application for purchase of part of the strip of unsurveyed land between Blk application for purchase of part of the strip of unsurveyed land between Bik 1, 1&GN Ry.Co.and blks 194,193,178, corrected according to your instructions as to changes it was necessary to make in my former location of the west lines of surveys in Blk.1, and a correction of an error I made in the field notes of survey 536 1/2, and an error in placing excess in sur 47 instead of adjacent state survey 542. The River meanders had been found correct between Surveys 69 & 37 incl.Blk 1, I&GN. The corrections of Runnels Co Land approved and the field notes of unsurveyed strip for I.G.Yates corrected to correspond and, I believe approved.

This leaves the applications of Mr. Holmes and Mr. Yates for the bal of the strip left by the Noelke award, to be corrected in accordance with the corrections required by the Noelke strip.

I enclose the field notes of the boundaries of the whole strip, with the river connections so as to show the corrections required as above noted, and in accordance with your favor of June 19 1918, and Dec 17 1919, & Nov. 19 1919.

I also enclose field notes covering the J.M.Holmes appli cation for 1280 acres starting at the Noelke and running north to the north end of adjacent land owned by Mr.Holmes, as stated by him. I also enclose application of Mr.Ira G.Yates for 2717 varas beginning at

the north end and running south to the south line of sur 51 which Mr. Yates states that he owns.

These two applications over lap, and I am sending in these notes simply as a staement of facts on which a settlement may be based.

The dates and No.s of these applications i did not insert as I do not know

what they are. The request, in yours of Nov. 19, 1919 for further information as to the Jessup scrap file east of Sheffield, has been given attention and I note what you say relative to surveys on the east bak of the river, but so far I have not been able to collate my field notes so as to give a satisfactory reply.

The Jessup file was made while I was working at Sheffield and was intended to save Mr. Jessup from a serious loss of land he had bought which appeared to be covered by the unsurveyed school land. I had already made the run from the Lancaster corner, and had sufficient data to show that a vacant strip existed but did not do enough work to definitely locate, but enough to warrant Mr. Jessup in filing his application.

I will again go over my field book and forward what data I find.

Respectfully 12 Dog State Sur.
