REPORT OF A SURVEY

Made to determine the true position of Surveys 1, 9, 18, 7, 6, 5 & 4 in John J. Terrell, Thos. C. Crosson and J. H. Taff, S. F. and adjacent lands in the Southeastern part of Presidio County, Texas, August and September 1941.

I was furnished a working sketch from the General Land Office at Austin, Texas, based on various ties to old established corners by a survey and report made by R. S. Dod, dated in 1915-16 & 17, which I used for a basis for my survey.

Beginning at a rk. md. mkd "NW24" in Block 14, G. H. & S. A. Ry. Co.

THENCE South 1895 vrs. to a point 19 vrs. North of an "X" cut on a large rock, being the bearing called for in the original Field Notes. The "X" called for in the original Field Notes as being 4 vrs. East was not found, but a large boulder answers the description and distance which is under high water and ^{the X} has likely been obliterated by sand and rocks washing over it. This would be the S. E. corner of Survey No. 13 in said Block 14.

THENCE I went on South at 1916 vrs. I found a rk. md. mkd. "S. W. 25" for the S. W. corner of Survey No. 25 said Block 14.

THENCE South at 950 vrs. I found a small rk. md. mkd "N. E. 11" brs. West 502 vrs. which checks very closely with R. S. Dod's report. I continued my line South 4055 vrs. to a point

THENCE West 500 vrs. found a rk. md. mkd. "S. E. 11". From this md. I ran N. 13 deg. 36' E. 63.8 vrs. and made a rk. md. mkd. the cap rk. "T" for the N. E. corner of Survey No. 513 and N. W. corner of Survey No. 514

I then ran S. 80 deg. W. 1882.6 vrs. and made a rk. md. mkd. the cap rk. "X" for the S. W. corner of Survey No. 1, Terrell, Crosson & Taff. This being 17.4 vrs. N. 80 deg. E. from the N. W. corner of Survey No. 513.

I then constructed the surveys as shown on plat in Field Notes submitted. My corners and distances conformed so close to R. S. Dod's work that I took his work as being correct instead of making the few minor changes.

September 19 1941.

Respectfully submitted

H. R. Gard
