

The correct length of *M^o Isaacs* South line 2230 varas
the distance given in field notes of the old survey
being 2200⁰⁰ Both stakes & mounds & bearing trees
are still standing — The length of *Joseph Motts*
South West line is 2500⁰⁰ the mounds &c are
still plain to be seen — the distance given
in old notes being 2400⁰⁰ — There are
several of these surveys that I could
not survey in a square form without
interfering with previous files —

John F. Hensley

C. Surveyor S. C.

AB

I allude to those numbered 4 & 7

File 2.

Saturn Scrip
